

# Washim Akram

Software Support Engineer

Vienna, Austria — +43 688 640 58036 — akram116223@gmail.com  
linkedin.com/in/washim-akram

## Professional Summary

Software engineer with several years of experience supporting production applications, investigating technical incidents, testing system changes, and maintaining SQL-based data services in international environments. Hands-on experience with SQL, ETL, XML, XSD/XML Schema, JSON, JSON Schema, JDBC, Microsoft SQL Server, MySQL, MongoDB, Windows, Linux, and basic Docker. Experienced in diagnosing application and database issues, validating fixes, documenting technical findings, and communicating clearly with users and engineering colleagues. Currently in the final semester of the Master's degree in Computer Science at the University of Vienna and available for full-time employment.

## Technical Skills

**Technical Support & Troubleshooting:** Production incident analysis, application troubleshooting, database issue diagnosis, service requests, remote support, on-site user support, manual testing, change validation, structured problem follow-up

**Data & Databases:** SQL, Microsoft SQL Server, MySQL, MongoDB, Pervasive ETL, SQL stored procedures, data-processing services, Microsoft Report Server, reporting workflows

**Web & Data Technologies:** XML, XSD/XML Schema, XSLT, XPath, XQuery, JSON, JSON Schema, structured data validation, transformation, querying, and data exchange

**Technical Support & Troubleshooting:** Technical customer support, email support, remote desktop support, Phone support, Live Chat support production incident analysis, application troubleshooting, database issue diagnosis, service requests, on-site user support, manual testing, change validation, structured problem follow-up

**Database Connectivity:** JDBC

**Operating Systems & Infrastructure:** Windows, Linux, production systems, system configuration, Docker (basic), TCP/IP, IP networking, LAN/WAN, VLAN concepts, connectivity troubleshooting

**Software Testing & Delivery:** Application testing, system testing, post-change validation, service stability checks, maintenance coordination, technical issue tracking

**Programming & Scripting:** SQL, Python, Java (OOP), PHP, C

**Tools & Platforms:** Postman, Git, GitLab, GitHub, Docker

**Documentation & Communication:** Technical documentation, operational documentation, test reports, status reporting, issue documentation, stakeholder communication, international team coordination

## Professional Experience

**Software Engineer — Limerick Resources Ltd.**

**Jan 2023 – Dec 2023**

*Dhaka, Bangladesh – Hybrid*

- Worked with XML, XSD/XML Schema, XSLT, XPath, XQuery, JSON, and JSON Schema for structured data validation, transformation, querying, and backend application integration.
- Configured and troubleshoot JDBC-based database connectivity for backend applications, investigating connection and data-access issues when they occurred.
- Investigated application and service-related issues, analyzed technical findings, and followed problems through with engineers until resolution.
- Performed structured manual testing after software changes, validating application behaviour, data handling, and system stability.
- Coordinated technical work across a team of more than five engineers involved in backend development, testing, and delivery.
- Prepared technical notes, test reports, status updates, and operational documentation to keep implementation details and technical findings clearly recorded.
- Helped improve development efficiency and reduce delivery time by approximately 25% through better coordination and structured execution of engineering work.

**Software Engineer — Nassprotech**

**Mar 2022 – Dec 2022**

*United States – Remote*

- Maintained backend applications and SQL-based services used in daily business operations, focusing on availability, data accuracy, performance, and reliability.
- Investigated production incidents with international engineering colleagues and helped identify application, database, and service-related causes.
- Maintained and optimized SQL stored procedures, data-processing services, and reporting solutions supporting opera-

tional business requirements.

- Worked with SQL and ETL-based data-processing workflows, including Pervasive ETL, as part of production data and reporting activities.
- Provided technical customer support by email and remote desktop, troubleshooting application, database, and service issues and following cases through resolution.
- Tested application and service changes after updates and validated system behaviour to support stable production operation.
- Improved technical and operational documentation and contributed to automation-related work for recurring service tasks.

#### **Junior Software Engineer — Nassprotech**

**Aug 2020 – Mar 2022**

*United States – Remote*

- Supported the development and maintenance of backend applications and data services operating in production environments.
- Diagnosed application, database, and operational issues with senior team members and contributed to resolving technical problems.
- Worked with SQL, ETL processes, and reporting systems while building practical experience with production data workflows and software services.
- Tested application and service changes and supported maintenance activities intended to keep production systems stable and available.
- Collaborated remotely with international colleagues, followed technical tasks through completion, and documented completed work and technical changes.

#### **Lab Teaching Assistant — Daffodil International University**

**Jan 2019 – Apr 2020**

*Dhaka, Bangladesh – On-site*

- Provided direct technical support to students experiencing computer, software-usage, and programming problems during practical laboratory sessions.
- Helped students investigate and resolve Object-Oriented Programming issues by explaining technical causes and practical correction steps.
- Supported day-to-day operation of laboratory computers and helped keep systems available for scheduled practical sessions.
- Responded to user questions in a structured, service-oriented manner and guided students through technical problems during lab work.
- Reviewed technical reports and provided clear feedback on implementation, problem solving, and documentation.

### **Education**

---

#### **Master of Science in Computer Science**

**2024 – Present**

University of Vienna, Vienna, Austria

Currently in the final semester.

#### **Bachelor of Science in Software Engineering**

**2016 – 2020**

Daffodil International University, Bangladesh

CGPA: 3.95 / 4.00 — German equivalent: 1.1

### **Languages**

**English:** C1

**German:** B1, currently working toward B2

**Bengali:** Native

### **Additional Information**

---

Eligible to work in Austria.
